

1881

1880-1882

In [1881](#), Litten first described an intraretinal hemorrhage associated with [subarachnoid hemorrhage](#) in the German literature.

However, Terson's description of vitreous hemorrhage following [subarachnoid hemorrhage](#) in [1900](#) is now associated with this syndrome.

Brainstem tumors were first described by Kummel in [1881](#) ¹⁾ and Monakow ²⁾. The first nosological classification was reported in [1926](#) by Bailey and Cushing who emphasized, for the first time, that **brainstem gliomas** could develop from certain embryological cells ³⁾.
