

# 2001

## 2000-2002

The [ICH score](#) was published in 2001 to estimate the 30-day mortality in conservatively treated patients with ICH.

---

Minimally invasive [lateral retroperitoneal transpsoas interbody fusion](#) was first introduced by Luiz Pimenta in [2001](#) <sup>1)</sup> <sup>2)</sup>, as an adaptation of an endoscopic [Lateral retroperitoneal transpsoas approach](#) to [lumbar fusion](#) described by Bergey et al. <sup>3)</sup>

---

Sridhar <sup>4)</sup> was the first, in [2001](#), to suggest a benign [spinal schwannoma classification](#) including giant and invasive spinal schwannomas (type I to V).

---

In [1995](#), a multidisciplinary task force from the [North American Spine Society](#) (NASS) addressed the deficiencies in commonly used terms defining the conditions of the [lumbar disc](#). It cited several documentations of the problem <sup>5)</sup> <sup>6)</sup> <sup>7)</sup> <sup>8)</sup> <sup>9)</sup> <sup>10)</sup>

The nomenclature and classification of [Lumbar disc](#) pathology consensus, published in [2001](#) by the collaborative efforts of the [North American Spine Society](#) (NASS), the American Society of Spine Radiology (ASSR), and the American Society of Neuroradiology (ASNR), has guided radiologists, clinicians, and interested public for more than a decade <sup>11)</sup>., it was revised in [2014](#) <sup>12)</sup> <sup>13)</sup>.
