

The ABC2 Dynamic Anterior Cervical Plating System is one of the most complete cervical plating systems on the market, offering unicortical and bicortical screws, a broad plate range and an extension plate (E-Plate). All ABC2 screws feature a unique spring-activated, self-locking mechanism that is easy to use and reduces surgical steps. The ABC2 Anterior Cervical Plates consist of Titanium alloy and are available in various lengths and configurations. The ABC2 E-Plate offers an intelligent solution for addressing adjacent segment disease.

With over 20,000 patients and more than 40,000 levels fused in the USA alone, the ABC2 Dynamic Anterior Cervical Plating System has a proven clinical history.
