Neurosurgery Department, University General Hospital of Alicante, Foundation for the Promotion of Health and Biomedical Research in the Valencian Region (FISABIO), Alicante, Spain

Even though [meningitis](#) caused by [Acinetobacter baumannii](#) is relatively rare, it is associated with high mortality rates especially in neurosurgery patients and represents a serious therapeutic problem due to the limited penetration of effective antibiotics into the cerebrospinal fluid.

Multidrug-resistant [Acinetobacter baumannii ventriculitis](#) is a serious clinical challenge for neurosurgeons ¹⁾.
