

Acute otitis media

Intracranial [complications](#) of [sinusitis](#) are rare but life threatening. Intracranial complications of [sinusitis](#) and [acute otitis media](#) are best managed in a specialist centre with multidisciplinary input. Concurrent ORL and neurosurgical intervention reduces [abscess](#) recurrence and requirement for revision neurosurgery in sinogenic complications and should represent the standard of care. Endoscopic sinus surgery is the ORL modality of choice in experienced hands ¹⁾.
