

Anesthetic management

Anesthetic [management](#) refers to the [administration](#) of [anesthetics](#) (drugs that cause loss of sensation or consciousness) for surgical [procedures](#), pain management, or other medical procedures. This involves selecting the appropriate anesthetic [{{agent}}](#)s, determining the appropriate dose, monitoring the patient's vital signs, and adjusting the [anesthetic](#) as necessary to ensure the patient's safety and comfort. Anesthetic management is typically performed by [anesthesiologists](#) or nurse anesthetists.
