

Artificial Intelligence Ethics in Neurosurgery

- Assessment of outcomes and machine Learning-based models to predict local failure risk following stereotactic radiosurgery for small brain metastases
- Availability and use of PET in patients with brain tumours - a European Organisation for Research and Treatment of Cancer - Brain Tumour Group (EORTC-BTG) survey
- Where are all the neurosurgery robots?
- Recent advances in diagnostic technologies for postoperative central nervous system infections: a review
- Artificial Intelligence in Glioblastoma-Transforming Diagnosis and Treatment
- Revolutionizing stroke prediction: a systematic review of AI-powered wearable technologies for early detection of stroke
- Artificial intelligence in neurosurgery: a systematic review of applications, model comparisons, and ethical implications
- Total and regional fat-to-muscle mass ratio and risks of pan-cancer: a prospective cohort study
