

BoneSave

Stryker BoneSave represents a reliable and effective alternative to conventional **bone graft**. BoneSave granules are intended to be as bone void filler for defects not intrinsic to the stability of the bony structure. They are medical grade calcium phosphate consisting of 80% tricalcium phosphate/20% hydroxyapatite, and provide an effective, biocompatible matrix.

Features & Benefits Quality, Flexibility, Convenience Radiopaque to allow easy visualization of healing status at follow-up Gamma irradiation sterilization 50% volume porosity Comes ready to use packaged in a single-use blister pack No special storage or preparation needed Cost-effective
