2014 Factor impact: 0.960

5-year Impact Factor: 1.051

Ranking: 140/198 (Surgery), 163/192(Clinical Neurology)

The British Journal of Neurosurgery is a leading international forum for debate in the field of neurosurgery, publishing original peer-reviewed articles of the highest quality, along with comment and correspondence on all topics of current interest to neurosurgeons worldwide.

Coverage includes all aspects of case assessment and surgical practice, as well as wide-ranging research, with an emphasis on clinical rather than experimental material. Special emphasis is placed on postgraduate education with review articles on basic neurosciences and on the theory behind advances in techniques, investigation and clinical management. All papers are submitted to rigorous and independent peer-review, ensuring the journal's wide citation and its appearance in the major abstracting and indexing services.

The British Journal of Neurosurgery is published in association with the Society of British Neurological Surgeons.
