

In a study, Nakamura et al. encountered a case of **C11orf**-RelA fusion-positive ST **anaplastic ependymoma** that was diagnosed in first tumor resection surgery of multi-staged gross total resection with molecular evidence. In ependymomas, regardless of tumor location or pathological grade, subtotal resection is associated with higher rates of mortality compared with GTR ¹⁾.

¹⁾

Nakamura T, Fukuoka K, Ikeda J, Yoshitomi M, Udaka N, Tanoshima R, Tateishi K, Yamanaka S, Ichimura K, Yamamoto T. Encouraging option of multi-staged gross total resection for a C11orf-RelA fusion-positive supratentorial anaplastic ependymoma. Brain Tumor Pathol. 2017 Oct;34(4):160-164. doi: 10.1007/s10014-017-0297-5. Epub 2017 Aug 22. PubMed PMID: 28831588.
