

In 2005 a weekend gathering of enthusiasts of anatomically-based established in Cambridge. As it consists of discussions and lectures, mostly based on three-dimensional (3D) projections of anatomical dissection of and intra-operative situations, it was named Cambridge Lectures in Neurosurgical Anatomy. It is aimed at neurosurgical trainees and qualified neurosurgeons, but medical students with interest in neurosciences have found it educational and inspirational. The continuation of the Lectures for over 10 years speaks for itself.

The Southeast Asia Edition of the Cambridge Lectures in Neurosurgical Anatomy came as a response to requests from many neurosurgeons in the region. It is recognised as by the Neurosurgical Anatomy Committee of the World Federation of Neurosurgical Societies (WFNS).
