

Case report

Case report is a detailed [report](#) of the [symptoms](#), [signs](#), [diagnosis](#), [treatment](#), and [followup](#) of an individual [patient](#). Case reports may contain a demographic profile of the patient, but usually describe an unusual or novel occurrence. Some case reports also contain a [literature review](#) of other reported cases.

Why Case Reports?

Data collection from the point of care integrating clinical expertise with external evidence informs the delivery of high-quality individualized healthcare. “Good case reporting demands a clear focus, to make explicit to the audience why a particular observation is important in the context of existing knowledge.” (Vandenbroucke 2001).

see [CARE guidelines](#).

[General University Hospital of Alicante Cases](#)

□ Case Report: [Insert concise case title here]

□[‡] **Authors:** [Your Name], MD; [Collaborator's Name], MD [Department or Institution Name]

□ Case Presentation

[Patient age, weight, origin or referral source, presenting complaint] [Initial clinical assessment and context] [Key past medical history if relevant]

□ Clinical Findings

□ Respiratory:

- [Ventilation, oxygenation, saturation levels]
- [Relevant blood gas values]

♥ Cardiopulmonary:

- [Heart rhythm, auscultation findings]

□ Temperature & Infection:

- [Fever status, current antibiotics]

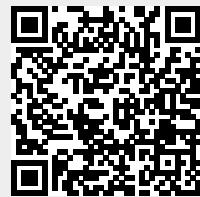

□ Final Diagnosis (if applicable)

[Insert final diagnosis if confirmed (e.g., Cystic craniopharyngioma)]

□ Keywords

case_report [diagnosis] [department] [keywords]
