

Chicago Review Course in Neurological Surgery

<http://www.chicagoreviewcourse.com/>

Chicago Review Courses™ is the provider with the most thorough and innovative medical reviews for physicians and practitioners at every stage of their careers. Our courses will provide you with dynamic and innovative techniques, help you reach your educational goals in the field of Neurosurgery and most of all learn these techniques from experienced and well known neurosurgeons.

The Chicago Review Course in Neurological Surgery™ has been recognized as one of the most thorough [reviews](#) of [neurosurgery](#) for thirty-five years. This rigorous eleven-day review in neurosurgery is now a traditional learning experience for [residents](#), newly established [neurosurgeons](#), and seasoned surgeons who want to ensure that their diagnostic and surgical skills are current.

Lecture content reflects the ongoing clinical developments in the field and what constitutes optimal care in diagnostic and therapeutic approaches, as well as the management of complications. This course uniquely blends coverage of the relevant basic science with in-depth lectures on virtually all areas of neurological surgery, not to mention a superb review of neuroradiology. Specific course features include: Neurosurgery Review

Up to 12 hours of daily lectures

Nearly 100 course topics

15,000 images presented.

Books

The Greenberg Rapid Review: A Companion to the 8th Edition

Written by an esteemed educator and founder of the renowned Chicago Review Course in Neurological Surgery™, this updated review reflects substantive content additions to the 8th edition. The two prior editions of the Rapid Review were must-have companions that fully leveraged the vast knowledge contained within Greenberg's legendary tome.

Through repetition and spot-on questions, this book brings clarity to a specialty whose sheer depth and breadth presents comprehension and retention challenges. This book helps readers determine if they are retaining key data and information, thereby providing a robust self-assessment study tool for

American Board of Neurological Surgery certification.

The 7th companion generated glowing reviews, such as: "A wonderful example of how to turn the classic Greenberg text into a study guide rather than an encyclopedic reference to a young neurosurgeon" -AANS Young Neurosurgeons News

Question formats include fill in the blank, open-ended questions, true/false, matching, and identification of various elements in diagrams/figures

Mnemonic devices, helpful hints, clinical pearls, and study charts aid in comprehension and long-term retention

Greenberg chapter headings are used (e.g. 4.2.3), thereby providing clear-cut Handbook references

This book is designed to help neurosurgical residents prepare for the ABNS primary examination and/or rounds. It will enable practicing neurosurgeons, neurologists, neuroradiologists, and neuropathologists to develop a storehouse of knowledge required to efficaciously examine, analyze, diagnose, and treat neurosurgical patients.
