

Clinical trial classification

There are two main types of [trials](#) or studies

Interventional study

[Interventional study](#).

Observational study

[Observational study](#).

[Trials](#) can fall into two broad categories: [pragmatic clinical trials](#) and [explanatory trials](#).

A placebo-controlled trial is a type of clinical trial

[clinicaltrials.gov](#)

[cochrane central register of controlled trials](#)

[International clinical trials registry platform](#) —

The reviewer needs to correlate the type of study selected, whether it be [observational](#) or [interventional](#), with the possibility that it will answer the [research question](#). The type of study indicates the level or quality of [evidence](#) and the accuracy of the information.

Study Classification

see [Study Classification](#).
