

□ Definition: Contribution

Contribution: A contribution is a specific input, action, or resource provided by an individual or group that adds value to a project, study, procedure, or organization.

In clinical research and neurosurgery, contributions may be:

- **Intellectual** – e.g., hypothesis generation, study design, data interpretation
- **Practical** – e.g., surgical intervention, patient recruitment, imaging acquisition
- **Financial** – e.g., funding, equipment, software licenses

□ Examples

- Designing a clinical trial protocol
- Performing tumor resection surgery
- Providing intraoperative imaging datasets
- Statistical analysis and data visualization
- Writing and revising a manuscript
