

CranioFix

Market introduction in 1997

Titanium [clamp system](#) CranioFix by [Aesculap](#).

CranioFix revolutionized cranial fixation in neurosurgery.

CranioFix 2 – the cranial fixation system for craniotomized bone flaps and bone fragments in skull fractures.

A distinguishing feature of CranioFix 2 is its quick and easy application. It provides optimal stability and reliable fixation of the bone flap to the cranium.

Absorbable Craniofix clamp

Advantages

Fast and easy application

Excellent reliability

Brilliant stability

Extraordinary smooth and safe operation

Indication

Fixation of craniotomized cranial bone flaps

Fixation of fractures at the brain skull

Properties

Well-known implant-material (Titanium alloy)

High bio-compatibility

MR-compatible
