

Craniosynostosis Etiology

Syndromic Craniosynostosis Etiology

The causes of craniosynostosis in most infants are unknown. Some babies have craniosynostosis because of changes in their genes. In some cases, craniosynostosis occurs because of an abnormality in a single gene, which can cause a genetic syndrome.

[Syndromic Craniosynostosis Etiology](#).

Primary [Craniosynostosis](#) is usually a [prenatal deformity](#).

Secondary Craniosynostosis

see [Secondary Craniosynostosis Etiology](#).
