

# Craniosynostosis Pathogenesis

Becker LE, Hinton DR. Pathogenesis of craniosynostosis. Pediatr Neurosurg. 1995;22(2):104-7. doi: 10.1159/000120885. PMID: 7710971.

The convergence of multi-signals on the [Erk1/2](#) signaling pathway indicated the vital role of Erk1/2 in the pathogenic processes of [craniosynostosis](#). Over the past years, researchers tried to interfere the processes of [suture fusion](#) via molecule mechanisms, especially FGFs and related signaling <sup>[1\)](#) [2\)](#) [3\)](#)</sup>
