

Cryptococcus neoformans

[Cryptococcus](#) neoformans is an encapsulated yeast that can live in both plants and animals. Its teleomorph is Filobasidiella neoformans, a filamentous fungus belonging to the class Tremellomycetes. It is often found in pigeon excrement.

Diagnosis

see [Cryptococcus Diagnosis](#).

Complications

Has been reported in only nine cases of [shunt infection](#).

see [Cryptococcus neoformans ventriculoperitoneal shunt infection](#)

The timing from shunt placement to symptom onset varies widely from 10 days to 15 months. Viereck et al., present a patient who developed a cryptococcal infection of his VP shunt more than two decades following shunt placement ¹⁾.
