

Cytoskeletal protein

Cytoskeletal [proteins](#) are a diverse group of proteins found in the [cells](#) of all living organisms. They play a crucial role in maintaining the structural integrity of the cell, facilitating cell movement, and enabling various cellular processes. The [cytoskeleton](#) is a dynamic network of protein [filaments](#) and [tubules](#) that provide shape, support, and organization to the cell.

Types

[Microfilaments](#) (Actin Filaments).

[Intermediate Filaments](#).

[Microtubules](#).
