

Dali

Department of Neurosurgery, The First Affiliated Hospital of Dali University, Dali, 671000, Yunnan, China.

- Large-scale survey, animal models and computational modeling identify histological neurodegenerative biomarkers for traumatic optic neuropathy
- Experimental and network pharmacology certify itraconazole mitigates fluorouracil-induced intestinal damage by inhibiting mTOR-mediated intestinal senescence
- Epidemiological status of family-based *Helicobacter pylori* infection in Yunnan Province, China
- Association of seizure control during pregnancy with adverse offspring outcomes in women with epilepsy
- Bioinformatics analysis to identify key invasion related genes and construct a prognostic model for glioblastoma
- Vorinostat attenuates UVB-induced skin senescence by modulating NF-κB and mTOR signaling pathways
- Developmental endothelial locus-1 as a potential biomarker for the formation and progression of intracranial aneurysm
- Intra-Arterial Urokinase After Endovascular Reperfusion for Acute Ischemic Stroke: The POST-UK Randomized Clinical Trial
