

Damage

“damage” typically refers to [harm](#) or [injury](#) to the body's tissues, organs, or systems. This damage can occur due to various factors such as trauma, infection, disease, or other pathological processes. The extent and type of damage can vary widely depending on the specific condition or injury involved. Treatment often focuses on repairing or managing the damage to promote healing and restore function.

[Facial nerve damage](#)

[Oxidative stress damage.](#)
