

# Desu Medical

**Desu Medical** is a Turkish [company](#) specializing in medical research and development, founded in 2007. It focuses on creating innovative products primarily for neurosurgery, orthopedics, and wound care. The company operates from its production facilities at Hacettepe University Teknokent in Ankara and has achieved significant recognition for its work on collagen-based medical products.

Desu Medical's product range includes collagen-based dural grafts (for repairing the dura mater), hydrocephalus shunt kits, external drainage systems (EVD/ELD), bone graft substitutes, and antibiotic-impregnated catheters. The company is notable for being one of the few globally that develops antibiotic-coated shunt systems, which help reduce the risk of infection in neurosurgical procedures<sup>[18†source]</sup><sup>[19†source]</sup>.

Their commitment to research and development is supported by partnerships with major scientific organizations like TÜBİTAK and KOSGEB, which assist in producing innovative solutions aimed at improving patient outcomes.
