

EANO Guidelines

see also [ESMO Guidelines](#)

The European Association of Neuro-Oncology (EANO) provides comprehensive, evidence-based guidelines to support the diagnosis, treatment, and follow-up care of patients with brain tumors across Europe. Multidisciplinary task forces develop these guidelines and are regularly updated to reflect the latest scientific and clinical advancements.

[Accessing EANO Guidelines](#)

You can explore the full collection of current EANO guidelines on their official website: [\[EANO Guidelines\]\(https://www.eano.eu/publications/eano-guidelines/\)](https://www.eano.eu/publications/eano-guidelines/)

[Key Guidelines Overview](#)

Here are some of the most recent and widely referenced EANO guidelines:

* **Diffuse Gliomas of Adulthood (2020)**

This guideline offers comprehensive recommendations for the diagnosis, treatment, and follow-up of adult patients with diffuse gliomas, incorporating molecular diagnostics and evidence from recent clinical trials. ([eano.eu][2])

* **Primary CNS Lymphoma (PCNSL) (2022)**

Provides consensus recommendations for the treatment of PCNSL, including considerations for intraocular manifestations and specific management strategies for elderly and immunosuppressed patients. ([eano.eu][3])

Brain Metastases from Solid Tumors 2021

Jointly developed with the [European Society for Medical Oncology](#) (ESMO), this guideline addresses the diagnosis, treatment, and follow-up of patients with [brain metastases](#) originating from solid tumors.

* **Meningiomas (2021)**

Updates recommendations for the diagnosis and management of meningiomas, reflecting recent advances in molecular genetics and clinical trial results. ([eano.eu][5])

* **Complications from CNS Tumor Treatments (2023)**

Focuses on preventing, diagnosing, and managing adverse effects and complications arising from treatments like surgery, radiotherapy, and pharmacotherapy in adult patients with primary CNS tumors. ([eano.eu][6])

* **Molecular Testing for Targeted Therapy (2023)**

Provides a comprehensive overview of molecular diagnostic tools for gliomas, glioneuronal, and neuronal tumors, aiding in the selection of targeted therapies. ([eano.eu][1])

☐ Focus on Glioma Management

The EANO guidelines on diffuse gliomas emphasize the integration of molecular diagnostics, such as IDH mutation status and 1p/19q codeletion, into the classification and treatment planning. They outline treatment pathways based on tumor grade and molecular characteristics, recommending combinations of surgery, radiotherapy, and chemotherapy tailored to individual patient profiles. These guidelines also highlight the importance of multidisciplinary care and the need to balance treatment efficacy with quality of life considerations.([Academia][7])

If you're interested in more detailed information on a specific guideline or topic, feel free to ask!
