

Fibroblast growth factor receptor 2

Fibroblast growth factor receptor 2 (FGFR2) also known as [CD332](#) (cluster of differentiation 332) is a protein that in humans is encoded by the [FGFR2](#) gene residing on [chromosome 10](#).

FGFR2 is a receptor for fibroblast growth factor.

The protein encoded by this gene is a member of the fibroblast growth factor receptor family, where the amino acid sequence is highly conserved between members and throughout evolution
