

Fissure of Rolando

The central sulcus is a fold in the [cerebral cortex](#) in the brains of vertebrates. Also called the central fissure, it was originally called the [fissure of Rolando](#) or the [Rolandic fissure](#), after [Luigi Rolando](#). It is sometimes confused with the [medial longitudinal fissure](#).

A range of neuroanatomical and neurological entities are named after him: the [Rolandic vein](#), the [Rolandic artery \(central sulcal artery\)](#), the pre-Rolandic artery ([precentral sulcal artery](#)), the [Rolandic operculum](#) (post-central operculum), the [Rolandic area \(primary motor cortex\)](#), the [substantia gelatinosa of Rolando](#), the [fissure of Rolando \(central sulcus\)](#) and [Rolandic epilepsy](#).
