

Gunshot wound

There are about 33,000 deaths caused by [gunshot wounds](#) in the USA each year. Probably half of these deaths result from head [wounds](#). Among US Army soldiers, 17% of all ballistic injuries are head wounds. This means that, even in those protected by ballistic [helmets](#), gunshot injuries to the head represent a danger.

Intracranial gunshot wound

see [Intracranial gunshot wound](#).

Spinal gunshot wound
