

Journal of neurosurgery. Case lessons.

- Management and outcomes for thoracic anterior spinal artery aneurysms: illustrative case
- Sequential and coexisting bilateral suboccipital cavernous sinus arteriovenous fistulas successfully treated with unilateral transvenous coil embolization: illustrative case
- Pial collateral shift after unilateral bypass in bilateral moyamoya disease: illustrative cases
- Staged carotid artery stenting for nilotinib-induced cervical internal carotid artery stenosis: illustrative case
- Recurrent parietal lobe supratentorial ependymoma, ZFTA fusion-positive, CNS WHO grade 3, with new dural and calvarial reactive changes in a child: illustrative case
- Refractory hemorrhage in chronic subdural hematoma: primary myelofibrosis with subdural extramedullary hematopoiesis. Illustrative case
- Surgical treatment to resect giant intraspinal epidural cavernous hemangioma of Cobb syndrome: illustrative case
- Diaphragm pacing for central hypoventilation syndrome due to unilateral cerebellomedullary infarction: illustrative case
