

Mitaka

Mitaka Kohki Co., Ltd. is a Japanese company specializing in the development of precision medical equipment, with a focus on **surgical microscopes** and advanced imaging systems for microsurgery. Their products are used in fields like **neurosurgery**, **ENT**, **plastic surgery**, and **supermicrosurgery**, which involves working with extremely fine structures, often smaller than 1 mm.

Mitaka's microscopes, such as the **MM51** and **MM90**, are renowned for their **high-resolution optics** and **advanced magnification capabilities**, allowing surgeons to perform delicate procedures with unmatched precision. The MM51, for example, offers **77x magnification** and includes integrated 4K imaging systems for high-detail visualization during surgeries.

Mitaka is also known for its collaboration with surgeons and research institutions, ensuring that their tools are tailored to clinical needs. They prioritize **ergonomics, precision, and innovation**, combining Japanese craftsmanship with cutting-edge technology.

For more information on their products, you can visit their official website [here](<https://mitakakohki.co.jp>).
