

A tumor board is a group of doctors and other health care providers with different specialties that meets regularly at the hospital to discuss cancer cases and share knowledge. The board's goal is to determine the best possible cancer treatment and care plan for an individual patient.

---

A study supported that the multidisciplinary approach to patient care can be particularly effective in managing brain tumors. A review by an expert neuroradiologist impacts patient management in the context of nMTBs, but has costs in terms of the time and effort spent preparing for it <sup>1)</sup>.
