

Nasociliary nerve (NC)

<http://www.3dneuroanatomy.com/wp-content/uploads/2014/12/orb8.jpg>

Branch of the **ophthalmic nerve**. It is intermediate in size between the two other main branches of the **ophthalmic nerve**, the **frontal nerve** and the **lacrimal nerve**, and is more deeply placed.

The nasociliary nerve (NC) and sixth nerves have medial trajectories inside the cavernous sinus
