

NCKAP1L (NCK Associated Protein 1 Like) is a Protein Coding gene. Diseases associated with NCKAP1L include Immunodeficiency 72 With Autoinflammation and Bronchus Cancer. Among its related pathways are Regulation of actin dynamics for phagocytic cup formation and Innate Immune System. Gene Ontology (GO) annotations related to this gene include DNA-binding transcription factor activity and protein-containing complex binding. An important paralog of this gene is NCKAP1.
