“Neurosurgical [on-call service](#)” refers to a medical [service](#) in [neurosurgery](#) that is available outside of regular [working hours](#) to address [emergency](#) cases or [urgent](#) neurosurgical issues. This service ensures that there are neurosurgeons accessible and ready to respond to critical situations that may arise at any time.

This term is specific to the field of neurosurgery, and it indicates a dedicated team or system in place to handle urgent neurosurgical cases during evenings, weekends, holidays, or other times when regular medical offices might be closed. It emphasizes the availability of neurosurgical [expertise](#) for emergencies.
