

Paget's disease treatment

There is no cure for [Paget's disease](#).

Decisions about treating Paget's disease may be complicated as the disease often affects people differently. In addition to this, it is sometimes difficult to predict whether a person with Paget's disease, who shows no signs or symptoms of the disorder, will develop symptoms or complications (such as a bone fracture) in the future.

Medical treatment

see [Paget's disease medical treatment](#).

Surgery

see [Paget's disease surgery](#)
