

Pallidal Deep Brain Stimulation indications

[Pallidal Deep Brain Stimulation for Parkinson's Disease](#)

see also [Subthalamic deep brain stimulation for Parkinson's disease](#)

GPI and [subthalamic nucleus](#) (STN) DBS improve motor function and activities of daily living for [Parkinson's disease](#) (PD) patients. Differences in therapeutic efficacy for PD were not observed between the 2 procedures. STN DBS allowed greater reduction in medication for patients, whereas GPI DBS provided greater relief from psychiatric symptoms. An understanding of other symptomatic aspects of targeting each region and long-term observations on therapeutic effects are needed ¹⁾.

Pallidal Deep Brain Stimulation for dystonia
