

Peginterferon alfa-2a

- Successful treatment of hairy cell leukaemia with pegylated interferon-alpha-2A
- A global comparison of hepatitis B & C drug pricing
- HBV-specific T-cell function is nonenhanced by tenofovir-induced decline in HBV viremia or HBsAg titer in chronic hepatitis B
- A greater frequency of circulating CCR7loPD-1hi follicular helper T cells indicates a durable clinical cure after Peg IFN- α therapy in chronic hepatitis B patients
- Cytologic Diagnosis of Lymphomatoid Granulomatosis, A Case Report and Review of the Literature
- Navigating the peginterferon Alfa-2a shortage: practical guidance on transitioning patients to ropeginterferon alfa-2b
- Frequency, Severity and Impact of Pegylated Interferon Alpha-Associated Flares in Hepatitis D Infection
- A case of chronic hepatitis B who achieved clinical cure with pegylated interferon alfa intermittent and combination therapy

see [Peginterferon alfa-2a](#) for cystic craniopharyngioma treatment.
