

Personality

- Automatic detection of hippocampal sclerosis in patients with epilepsy
- Direct SERS profiling of small extracellular vesicles in cerebrospinal fluid for pediatric medulloblastoma detection and treatment monitoring
- Classification of glioma grade and Ki-67 level prediction in MRI data: A SHAP-driven interpretation
- Optimized stereoelectroencephalography-guided thermocoagulation versus anterior temporal lobectomy in mesial temporal epilepsy: A pilot randomized controlled study
- Genetic mechanisms, brain structures, and peripheral biomarkers mediate the relation between physical frailty and neuropsychiatric disorders
- Thrombosis and Coagulopathy
- Postoperative Initiation of Thromboprophylaxis in patients with Cushing's Disease (PIT-CD): a randomized controlled trial
- High diagnostic accuracy of gastric tube tip manometry for nasogastric tube positioning in neurocritical care - Response to Xue Cheng

Personality is defined as the characteristic set of [behaviors](#), [cognitions](#), and [emotional](#) patterns that evolve from biological and environmental factors.

While there is no generally agreed-upon definition of personality, most theories focus on motivation and psychological interactions with one's environment.

Personality Trait
