

Phase 1 randomized controlled trial

The first of the [phases](#) of [clinical research](#).

The first studies conducted in humans using an experimental intervention. These trials often have small sample sizes (e.g., <20), may enroll healthy human participants, and are used to investigate pharmacokinetics, pharmacodynamics, and toxicity.

Phase I trials can be further divided:

[Phase 1 A randomized controlled trial](#)

[Phase 1 B randomized controlled trial](#)
