

PLP1 (Proteolipid Protein 1) is a Protein Coding gene. Diseases associated with PLP1 include [Pelizaeus-Merzbacher Disease](#) and Spastic Paraplegia 2, X-Linked. Among its related pathways are Glial Cell Differentiation and Sudden Infant Death Syndrome (SIDS) Susceptibility Pathways. Gene Ontology (GO) annotations related to this gene include structural molecule activity and structural constituent of myelin sheath. An important paralog of this gene is GPM6B.
