

Primary brain tumor

Include any tumor that starts in the [brain](#).

Primary [brain tumors](#) can start from brain cells, the membranes around the brain (meninges), nerves, or glands.

[Glioblastoma](#) (GBM) is the most common and aggressive primary brain tumor characterized by poor [prognosis](#) and high [recurrence](#). The underlying molecular mechanism that drives tumor progression and recurrence is unclear.

Examples

[Primary central nervous system lymphoma...](#)

see [Central nervous system tumor](#).

see [Pediatric brain tumor](#).

Clinical features

[Primary brain tumor clinical features](#).

Diagnosis

[Intracranial tumor diagnosis](#)
