

Prostate-specific antigen

- Development and clinical potential of (18)F-PSiMA for prostate cancer PET imaging
- Clinical Outcomes of Metastasis-directed Therapy for Oligo-metastatic Prostate Cancer Diagnosed Using PSMA-PET/CT or Whole-body MRI
- PSMA radioligand uptake correlates with PSMA expression in high-grade glioma and brain metastasis: insights from a prospective PET-MRI guided multiregional biopsy study
- Survival outcomes and clinical characteristics of brain metastases from prostate cancer: A single-center analysis
- Salvage metastasis-directed therapy versus elective nodal radiotherapy for oligorecurrent nodal prostate cancer metastases (PEACE V-STORM): a phase 2, open-label, randomised controlled trial
- A pH/STEAP Cascade-Responsive Nanomedicine with Self-Supplied Peroxide for Precise Chemodynamic Therapy
- Extra-axial small cell prostate carcinoma intracranial metastasis: illustrative case
- The effect of flavonoid and subclasses supplementation on prostate specific antigen, hormonal parameters and prostate cancer risk: a systematic review and meta-analysis of randomized controlled trials

The **Prostate-specific antigen test** is a **blood test** to help detect **prostate cancer**
