RevMan

Review Manager (RevMan) is the software used for preparing and maintaining Cochrane Reviews.

RevMan facilitates the preparation of protocols and full reviews, including text, characteristics of studies, comparison tables, and study data. It can perform a meta-analysis of the data entered and present the results graphically.

You can also use RevMan to write reviews of diagnostic test accuracy studies, reviews of studies of methodology, and overviews of reviews.

The latest major version, RevMan 5.3, was released on 13 June 2014. They are currently working on the next generation of online review-writing software, RevMan Web.

RevMan 5 is no longer being developed, but they continue to support Cochrane authors who use the programme.
