

# Saint Louis

St. Louis is an independent city and inland port in the U.S. state of Missouri. The city developed along the western bank of the Mississippi River, which forms Missouri's border with Illinois.

## Department of Neurosurgery, Washington University in St. Louis, Missouri

Since 1919, the Washington University Department of Neurosurgery has had a strong tradition of clinical excellence, outstanding research and dynamic teaching.

Train residents, fellows and scientists so that they can be leaders in the fields of academic neurosurgery and neurosurgical research;

Conduct basic and clinical research to better understand the causes of neurological diseases so that we can apply this knowledge toward better diagnoses and treatments.

The neurosurgeons provide surgical care at Barnes-Jewish Hospital, ranked 11th in the nation for adult neurology and neurosurgery by U.S. News & World Report in 2014, and at St. Louis Children's Hospital, ranked #5 in the nation by U.S. News for pediatric neurosurgery in 2014-2015.

8420119. 143: Francel TJ, Dellon AL. Functional limb salvage combining gastrocnemius neurotization and posterior tibial nerve grafting: a case report. *J Reconstr Microsurg.* 1992 May;8(3):209-13; discussion 213-4. PubMed PMID: 1629800. =====Case series===== 2017==== In the Department of Neurosurgery, Washington University School of Medicine in [St. Louis, Missouri](#), Seventeen patients underwent 23 procedures using the [ROSA](#) system. A total of 87 [electroencephalography electrodes](#) were placed, with 13% deviating more than 3 mm from target. Six patients underwent stereotactic needle biopsy, and 9 underwent laser interstitial thermotherapy (LITT). One patient who underwent LITT required a subsequent craniotomy for tumor resection. Another patient experienced an asymptomatic extraaxial hematoma that spontaneously resolved. No patient suffered neurological complications during follow-up. Follow-up from the last procedure averaged 180 days in epilepsy patients and 309 days in oncology patients. The precision, ease of use, and versatility of the ROSA system make it well suited for pediatric neurosurgical practice. Further work, including long-term analysis of results and cost-effectiveness, will help determine the utility of this system and if its applications can be expanded ((Miller BA, Salehi A, Limbrick DD Jr, Smyth MD. Applications of a robotic stereotactic arm for pediatric epilepsy and neurooncology surgery. *J Neurosurg Pediatr.* 2017 Aug 4:1-7. doi: 10.3171/2017.5.PEDS1782. [Epub ahead of print] PubMed PMID: 28777037.
