

Scalp hematoma

Scalp hematomas occur on the outside of the **skull** and often can be felt as a bump on the **head**. Because the **injury** is to the **skin** and muscle layers outside of the skull, the scalp **hematoma** itself cannot press on the **brain**.

Scalp **hematoma** is with low risk for **intracranial injury**.

Differential diagnosis

Primary **Angiosarcoma** Masquerading as **Scalp Hematoma** After **Head Injury** ¹⁾.
