Department of Neurosurgery, Stanford School of Medicine, Stanford University, Palo Alto, California.

Hospital and Clinics (Palo Alto, Calif.).

The Stanford Brain Tumor Center touts the latest chemotherapy and immunotherapy protocols and a premier radiosurgery program. Stanford is the original site where John Adler, MD, developed the CyberKnife and where it was first used on a patient in 1994. To date, the center has treated 5,500 patients via CyberKnife. U.S. News & World Report recognized Stanford's neurosurgery program as 31st in the nation.

In April 2013, Stanford launched its Neuro Neonatal Intensive Care Unit (Neuro-NICU), which is housed within the Level III Intensive Care Nursery at Lucile Packard Children's Hospital Stanford.
