

Sutter

Sutter Medizintechnik GmbH is a German company specializing in the development and manufacturing of advanced **electrosurgical instruments**, with a focus on precision tools for **microsurgery** and **neurosurgery**. Founded in 1970 and headquartered in Freiburg, Germany, Sutter is known for its high-quality **bipolar forceps** and **radiofrequency ablation (RFA)** devices, which are used by surgeons worldwide.

Key Products: 1. **SuperGliss® Bipolar Forceps**: These are widely recognized for their minimal sticking and precise coagulation during surgery, especially in microsurgery and neurosurgery. 2. **CURIS® 4 MHz Radiofrequency Generator**: This device provides highly controlled, minimally invasive radiofrequency ablation for various surgical procedures, offering precision and reducing thermal damage to surrounding tissues. 3. **Calvian® Bipolar Scissors**: These scissors are designed for cutting and coagulating tissue simultaneously, providing enhanced surgical control.

Sutter focuses on continuous innovation, working closely with surgeons to improve their products for neurosurgical, ENT, and plastic surgery applications.
