

Target Detachable Coil

The Target [Detachable Coil](#) is designed for the treatment of neurovascular [aneurysms](#) and peripheral [embolization](#), with consistently smooth deployment and exceptional microcatheter stability. The Target Coil platform delivers [coil](#) conformability, softness and volume in a single product family.

Features and benefits:

The Target Coil delivery wire is engineered to optimize pushability, flexibility, trackability and durability

The 360° shape is designed to seek the outer wall and leave an open center, making it ideal for concentric filling

The Target Detachable Coil family is the market-leading coil portfolio offering comprehensive solutions from frame-to-finish, including larger diameter Target XL Coils, a complete suite of 10-sized coils and the Target Nano Coil. With sizes ranging from 1-24mm, three coil shapes, four levels of softness and progressive volume options, Target offers a versatile and conformable coil for every patient.
