

Tecres

Tecres S.p.A. is an Italian company founded in 1981, specializing in the development and production of **acrylic resins** and **medical devices** for use in **orthopedics**, **vertebral augmentation**, **neurosurgery**, and **traumatology**. Their product range is particularly notable for **bone cements** and **preformed spacers**, which are used for treating periprosthetic joint infections (PJIs), spinal fractures, and in cranioplasty procedures. One of their key innovations is **Cemex®**, a high-performance bone cement used in orthopedic surgeries.

Tecres also offers custom implants for complex medical cases, including **patient-specific cranial prostheses** and other products designed for high-precision medical interventions. As part of the **Demetra Group**, Tecres is recognized as a leading provider of medical-grade acrylic resins and operates globally with a presence in over 70 countries. For more details, you can visit their official website [here](<https://www.tecres.com>).
