

Thieme

Thieme Medical Publishers is a medical and science [publishing](#) service from the Thieme Publishing Group from [Germany](#). It produces professional [journals](#), [textbooks](#), [atlases](#), monographs and reference books in both German and English covering a variety of medical specialties, including [neurosurgery](#), orthopaedics, endocrinology, radiology, anatomy, chemistry, otolaryngology, ophthalmology, audiology and speech language pathology, and complementary and alternative medicine. Thieme has more than 1,000 employees and maintains offices in seven cities worldwide, including New York, Beijing, Delhi, Stuttgart, and three other cities in Germany.

History

Georg Thieme Verlag was founded in 1886 in Leipzig, Germany, by [Georg Thieme](#) when he was 26 years old. Thieme remains privately held and family-owned. The company received some early success in [1896](#) by publishing Wilhelm Röntgen's famous picture of his wife's hand in what is still one of Thieme's and Germany's oldest journals, the Deutsche Medizinische Wochenschrift. In 1919, Georg Thieme partnered with Bruno Hauff, a young publisher from Leipzig. When Thieme died in 1925, ownership of the company passed to Hauff. Members of the Hauff family have been the proprietors of the business ever since.

In 1946, two years after Thieme had been bombed and forced to close completely during World War II, the Allies relocated the company from Leipzig in the eastern sector to [Stuttgart](#) in the west where it was provided with a license to publish and distribute journals, brochures, and books.

Guenther Hauff, son of Bruno, acquired Stratton International Medical Book of New York in 1979, and several years later, in 1984, the two companies merged to become Thieme Medical Publishers New York.
