

Three-dimensional endoscope

- Robotic posterior retroperitoneoscopic adrenalectomy: initial experience with Hugo™ RAS system
- Multidimensional light field endoscope for robotic and AI guided surgery
- Endoscopic ultrasound-guided pancreatic duct drainage: Progress and future outlook
- Answer to the Letter to the Editor from Hinpetch Daungsupawong Concerning "Development of New Surgical Training for Full Endoscopic Surgery Using 3D-Printed Models"
- Endoscopic management of infected necrotizing pancreatitis: Advancing through standardization
- The effect of different degrees of visible trephine-based foraminoplasty in PETD surgery on lumbar biomechanics: a finite element analysis
- Advancing colonoscopy training: tailored strategies and simulation-based models for skill mastery
- Three-dimensional Location Approach with Silk Thread Guided Laparoscopic Segmentectomy for Liver Tumor

In Neurosurgery

- The meningo-orbital band from an endoscopic transorbital approach: an anatomical study
- Trigeminal neuralgia caused by compression of the trigeminal nerve between the vertebral artery and Meckel's cave meningioma extending to the posterior fossa successfully treated with the endoscopic-assisted anterior petrosal approach
- Augmented reality system for endoscopic pituitary surgery with automatic registration
- Meningeal architecture of Meckel's Cave and its surgical implications: A study using epoxy sheet plastination and three-dimensional reconstruction
- 3D reconstruction in endonasal pituitary surgery
- O-arm navigation-based transforaminal unilateral biportal endoscopic discectomy for upper lumbar disc herniation: an innovative preliminary study
- Development and validation of a cost-effective three-dimensional-printed cervical spine model for endoscopic posterior cervical foraminotomy training: a prospective educational study from Turkey
- Three-dimensional imaging anatomical study of the lateral optocarotid recess and the accessory sphenoidal septum
